PITTSBURGH, March 15 /PRNewswire/ -- Two Pittsburgh-based VoIP providers, *VoIPstreet* and VoIP Innovations, have come together to create an all-in-one VoIP solutions provider that offers both retail and wholesale VoIP services and boasts one of the nation's largest networks.

VoIPstreet will keep its name on the group's retail solutions due to a well-established presence and track record within the industry, but will officially be under the VoIP Innovations umbrella.

VoIP Innovations already boasted one of the largest nationwide networks in the industry. Now that *VoIPstreet* is offering its retail services under the VoIP Innovations moniker, that already robust, fully redundant network swells to more than 7,500 rate centers across the contiguous U.S.

"We think this move makes a lot of sense for both companies," said VoIP Innovations Product Manager and former *VoIPstreet* President Jason Tapolci. "We get to leverage the unique brands, service offerings and infrastructure to create a one of a kind world-class network. We really feel like this is an excellent opportunity for both businesses."

VoIP Innovations, a wholesale Voice-over-Internet-Protocol provider with more than 20 years in the industry, offers U.S. and toll-free inbound calling and U.S. and International outbound to VoIP service providers. *VoIPstreet*, with more than 10 years experience in the retail VoIP market, offers cost-reducing SIP Trunking and metered VoIP solutions for businesses of all sizes.

The move casts VoIP Innovations as a major player in the continually growing VoIP industry.
